Rock Mechanics and Mining Sciences

Editor-in-Chief

Professor J. A. Hudson
7 The Quadrangle
Welwyn Garden City
Herts AL8 6SG, U.K.

Editorial Advisors

Professor W. F. Brace
Department of Earth & Planetary Sciences, Massachusetts Institute of Technology, Cambridge, MA 02139, U.S.A.
Professor E. T. Brown
Faculty of Engineering, University of Queensland, St Lucia, Queensland 4067, Australia.
Professor N. G. W. Cook
Department of Materials Science and Engineering, University of California, Hearst Mining Building, Berkeley, CA 94720, U.S.A.
Professor C. Fairhurst
Department of Civil and Mineral Engineering, 122 Civil and Mineral Engineering Building, 500 Pillsbury Drive S.E., University of Minnesota, Minneapolis, MN 55455-0220, U.S.A.
Professor R. E. Goodman
Department of Civil Engineering, University of California, Davis Hall, Berkeley, CA 94720, U.S.A.
Professor E. Hoek
Department of Civil Engineering, University of Toronto, Toronto, Ontario, Canada M5S 1A4.

Editorial Board

Professor G. Barla
Department of Structural Engineering, Technical University (Politecnico) of Turin, Corso Duca delgi Abruzzi 24, 10129 Torino, Italy.
Dr B. H. G. Brady
Itasca Consulting Group Inc., Suite 210, 1313 Fifth Street S.E., Minneapolis, MN 55414, U.S.A.
Dr F. H. Cornet
Institut de Physique du Globe, Université Pierre et Marie Curie, 4 place Jussieu, 75230 Paris Cedex 05, France.
Professor S. L. Crouch
Department of Civil and Mineral Engineering, 122 Civil and Mineral Engineering Building, 500 Pillsbury Drive S.E., University of Minnesota, Minneapolis, MN 55455-0220, U.S.A.
Professor Y. D. Diadkin
G. V. Plekhanov Leningrad Mining Institute, Leningrad V-26, 21 Liniya 2, U.S.S.R.
Professor H. K. Kutter
Ruhr-Universität Bochum, Institut für Geologie, 463 Bochum, Universitätsstrasse 150, F.R. Germany.
Dr P. R. La Pointe
ARCO Oil and Gas Company, Research and Development Department, P.O. Box 2819, Dallas, TX 75221, U.S.A.
Professor N. R. Morgenstern
Department of Civil Engineering, University of Alberta, Edmonton, Alberta, Canada T6G 2E1.
Professor Y. Nishimatsu
Department of Mineral Development Engineering, University of Tokyo, Hongo 7-3-1, Bunkyo-ku, Tokyo 113, Japan.
Professor W. G. Pariseau
Department of Mining Engineering, University of Utah, 318 W. C. Browning Building, Salt Lake City, UT 84112, U.S.A.
Professor F. F. Roxborough
School of Mining Engineering, University of New South Wales, P.O. Box 1, Kensington, New South Wales 2033, Australia.
Professor O. Stephansson
Luleå University of Technology, Division of Rock Mechanics, S-951 87 Luleå, Sweden.
Professor T. K. Tan
Institute of Geophysics, Academia Sinica, Beijing, China.
Dr H. Wagner
Chamber of Mines, P.O. Box 809, Johannesburg 2000, South Africa.

Geomechanics Abstracts

Editor

Dr D. H. Spencer

Editorial Director

Professor J. A. Hudson
Rock Mechanics Information Service
Imperial College of Science, Technology and Medicine,
Royal School of Mines, Prince Consort Road,
London SW7 2BP, U.K.

Geomechanics Literature Search Service

The Rock Mechanics Information Service will carry out retrospective information searches on request. This search will encompass the GeoMechanics Abstracts database (see below) which covers all material published in the *International Journal of Rock Mechanics and Mining Sciences & Geomechanics Abstracts* since 1977 and other material published in its original form before and since this date. Other databases may also be searched on request. Initial enquiries may be made by telephone, fax, post or telex. Search requests can be in the requester's own terms or as a list or combination of keywords. Background information on the project requiring the search is also useful. The cost of this service is £40 per search topic plus £0.45 per printed reference (at 12/1989). VAT or airmail postage will be added where applicable. Enquiries should be addressed to the **Rock Mechanics Information Service** at the above address.

Geomechanics Abstracts Data Base

The GeoMechanics Abstracts database (GMA), one of the many available online from the ORBIT Search Service Division of Maxwell Online, covers the fields of rock mechanics, soil mechanics, and engineering geology, plus the many closely related disciplines. GMA is available to the public for literature searching.

For further details please contact the ORBIT Search Service at:

NORTH AMERICA
8000 Westpark Drive, McLean, VA 22102, U.S.A.
Tel: (800) 45-ORBIT (toll free)/(703) 442-0900;
Fax: (703) 893-4632

EUROPE
Achilles House, Western Avenue, London W3 0UA, U.K.
Tel: (01) 992-3456; *Fax:* (01) 993-7335; *Telex:* 8814614

AUSTRALIA
P.O. Box 544, Potts Point, NSW 2011
Tel: (02) 360-2691 (direct)/(02) 331-5211 (switchboard)/(008) 22-6474 (toll-free); *Fax:* (02) 332-2304

JAPAN
USACO Corporation, 13-12 Shinbashi 1-Chome, Minatoku, Tokyo, 105, Japan
Tel: (03) 502-6471; *Fax:* (03) 593-2709;
Telex: J26274 USACO TOKYO

Publishing office: Pergamon Press plc, Journals Production Unit, Hennock Road, Marsh Barton, Exeter EX2 8NE, Devon, U.K. (*Tel.* (0392) 51558; *Telex* 42749).

Subscription and advertising offices: Enquiries from customers in North America should be sent to Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A.; and from the rest of the world to Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, U.K. (*Tel.* (0865) 64881).

Annual subscription rates 1990: Annual institutional subscription rate (1990) DM 1230.00; 2-year institutional rate (1990/91) DM 2337.00; personal subscription rate for those whose library subscribes at the regular rate (1990) DM 180.00. Members of the International Society for Rock Mechanics may order personal subscriptions at a concessional rate. Details of these rates are available on request. Prices are subject to amendment without notice.

Back issues: Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon Press.

♾™ The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

Published 6 issues per annum. Copyright © 1990 Pergamon Press plc

CONTENTS OF VOLUME 26

Number 1

Swedish Rock Mechanics

	i	Editorial
O. Stephansson	1	Rock mechanics in Sweden
F. Ouchterlony	13	On the background to the formulae and accuracy of rock fracture toughness measurements using ISRM standard core specimens
B. Forsman and C. L. Pan	25	Shear properties of fragmented rock masses—model tests and theories
G. Wijk	37	The stamp test for rock drillability classification
L. G. Karlsson, B. Lundberg and K. G. Sundin	45	Experimental study of a percussive process for rock fragmentation
E. Nordlund	51	The effect of thrust on the performance of percussive rock drills
B. A. Leijon	61	Relevance of pointwise rock stress measurements—an analysis of overcoring data
C. Ljunggren and B. Amadei	69	Estimation of virgin rock stresses from horizontal hydrofractures
R. Pusch	79	Alteration of the hydraulic conductivity of rock by tunnel excavation
U. Lindblom	85	The performance of water curtains surrounding rock caverns used for gas storage
H. Stille, M. Holmberg and G. Nord	99	Support of weak rock with grouted bolts and shotcrete
N. Krauland, P. Söder and G. Agmalm	115	Determination of rock mass strength by rock mass classification—some experiences and questions from Boliden mines
Geomechanics Abstracts	1A	

Number 2

F. Homand-Etienne and R. Houpert	125	Thermally induced microcracking in granites: characterization and analysis
G. Swan, J. Cook, S. Bruce and R. Meehan	135	Strain rate effects in Kimmeridge Bay shale
Technical Notes		
G. West	151	Rock abrasiveness testing for tunnelling
J. C. Prucz and S.-H. Fu	161	Prediction of dynamic fracture modes in coal mining
Geomechanics Abstracts	51A	

Number 3/4

Forced Fluid Flow Through Fractured Rock Masses

F. H. Cornet	I	Introduction
N. Niitsuma	169	Fracture mechanics design and development of HDR reservoirs—concept and results of the Γ-project, Tohoku University, Japan
M. Thiercelin	177	Fracture toughness and hydraulic fracturing
A. Guenot	185	Borehole breakouts and stress fields
K. Hayashi, T. Ito and H. Abé	197	*In situ* stress determination by hydraulic fracturing—a method employing an artificial notch
I. Matsunaga, M. Kuriyagawa and S. Sasaki	203	*In situ* stress measurements by the hydraulic fracturing method at Imaichi pumped storage power plant, Tochigi, Japan
M. C. Fehler	211	Stress control of seismicity patterns observed during hydraulic fracturing experiments at the Fenton Hill hot dry rock geothermal energy site, New Mexico
J. Fréchet, L. Martel, L. Nikolla and G. Poupinet	221	Application of the cross-spectral moving-window technique (CSMWT) to the seismic monitoring of forced fluid migration in a rock mass
F. H. Cornet and Ph. Julien	235	Stress determination from hydraulic test data and focal mechanisms of induced seismicity
E. L. Majer	249	The application of high frequency seismic monitoring methods for the mapping of grout injections
R. Baria, A. S. P. Green and R. H. Jones	257	Anomalous seismic events observed at the CSM HDR project, U.K.
A. S. P. Green, R. Baria and R. Jones	271	VSP and cross-hole seismic surveys used to determine reservoir characteristics of a hot dry rock geothermal system
D. Billaux, J. P. Chiles, K. Hestir and J. Long	281	Three-dimensional statistical modelling of a fractured rock mass—an example from the Fanay-Augères mine
R. Jung	301	Hydraulic *in situ* investigations of an artificial fracture in the Falkenberg granite
R. J. Pine	309	Medium viscosity, large volume fluid injection for HDR development in jointed rock
M. Asgian	317	A numerical model of fluid-flow in deformable naturally fractured rock masses
D. Elsworth	329	Thermal permeability enhancement of blocky rocks: one-dimensional flows
R. J. Hopkirk and L. Rybach	341	Modelling pressure behaviour in artificially stimulated rock masses—matching field pressure records
Geomechanics Abstracts	107A	

F. Rummel and J. Hansen 483 Interpretation of hydrofrac pressure recordings using a simple fracture mechanics simulation model

M. P. Hardy and M. I. Asgian 489 Fracture reopening during hydraulic fracturing stress determinations

D. R. Schmitt and M. D. Zoback 499 Poroelastic effects in the determination of the maximum horizontal principal stress in hydraulic fracturing tests—a proposed breakdown equation employing a modified effective stress relation for tensile failure

Section B—In High Permeability Rock (Oil Field Experience)

E. Detournay, A. H.-D. Cheng, J.-C. Roegiers and J. D. McLennan 507 Poroelasticity considerations in *in situ* stress determination by hydraulic fracturing

P. de Bree and J. V. Walters 515 Micro/minifrac test procedures and interpretation for *in situ* stress determination

N. R. Warpinski 523 Determining the minimum *in situ* stress from hydraulic fracturing through perforations

G. Holzhausen, P. Branagan, H. Egan and R. Wilmer 533 Fracture closure pressures from free-oscillation measurements during stress testing in complex reservoirs

J. Shlyapobersky 541 On-site interactive hydraulic fracturing procedures for determining the minimum *in situ* stress from fracture closure and reopening pressures

Ph. Charlez, R. Herail and D. Despax 549 Interpretation of hydraulic fracture parameters by inversion of pressure curves

K. Bennaceur and J.-C. Roegiers 555 Mechanisms affecting pressure decline during fracturing

Part II—Laboratory Studies and Field Experience

Bezalel C. Haimson 563 Introduction to Part II

R. J. Pine and K. A. Kwakwa 565 Experience with hydrofracture stress measurements to depths of 2.6 km and implications for measurements to 6 km in the Carnmenellis granite

D. W. Brown 573 The potential for large errors in the inferred minimum earth stress when using incomplete hydraulic fracturing results

B. Bjarnason, C. Ljunggren and O. Stephansson 579 New developments in hydrofracturing stress measurements at Luleå University of Technology

M. Kuriyagawa, H. Kobayashi, I. Matsunaga, T. Yamaguchi and K. Hibiya 587 Application of hydraulic fracturing to three-dimensional *in situ* stress measurement

L. S. Cheung and B. C. Haimson 595 Laboratory study of hydraulic fracturing pressure data—how valid is their conventional interpretation?

T. W. Doe and G. Boyce 605 Orientation of hydraulic fractures in salt under hydrostatic and non-hydrostatic stresses

W. R. Wawersik and C. M. Stone 613 A characterization of pressure records in inelastic rock demonstrated by hydraulic fracturing measurements in salt

D. D. Bush and N. Barton	629	Application of small-scale hydraulic fracturing for stress measurements in bedded salt
W. S. Whitehead, J. M. Gatens III and S. A. Holditch	637	Determination of *in situ* stress profiles through hydraulic fracturing measurements in two distinct geologic areas
K. Evans and T. Engelder	647	Some problems in estimating horizontal stress magnitudes in "thrust" regimes
J. Baumgärtner and F. Rummel	661	Experience with "fracture pressurization tests" as a stress measuring technique in a jointed rock mass
D. Burlet, F. H. Cornet and B. Feuga	673	Evaluation of the HTPF method of stress determination in two kinds of rock
F. Li	681	Improvements on hydrofracturing technology and its interpretation of data
Geomechanics Abstracts	289A	

Vol. 26 Supplement

The International Society of Rock Mechanics List of Members 1989 was produced as a Supplement to the journal during 1989. It was supplied to all subscribers with their copy of Volume 26 Number 3/4.
